02 The intervention for mothers in late pregnancy

The activity of Safe Pregnancy—Background

- 1、 The newborn babies in Wuhan are around 120,000 to 130,000 which means there are at least 10,000 pregnant women in Wuhan for the past month.
- 2、 After the outbreak of the coronavirus, many local hospitals have shifted into the medicare designated hospitals for treating the pneumonia and stop offering pregnancy check-ups. There are also many restrictions for the Wuhan residents in their communities or traffic, which made the local citizens find it difficult to go out.
- 3、 At the beginning of February, the public payed more attention to the coronavirus instead of the pregnant women.

The activity of Safe Pregnancy—Background and Requirements

Pregnant women are the most susceptible groups in the society, we offer the online doctor consultation and the dolphin team for help.

Frequent outgoing in the pandemic period will increase the risks for the pregnant women and their babies and also added more pressure to the mothers.

The activity of Safe Pregnancy—Action

Pregnant mothers end-deliver to home

1 Online recruiting - screening-publishing

2 Package delivery to home

3 Logistics restriction-local volunteer to deliver

Service end-online team

1 Mom volunteers-instructing APP using and managing

2 Doctor from the maternity hospital online inquiry+AI for double recognition

3 Doctor teams instruct pregnant women in critical condition to get medical help

Recruitment

Mom with special needs asking for assistance

Recruiting is difficult than expected

Logistics

Restricted logistics

The COVID-19 response activity of One Foundation-Responses

1.Special needs—priority to elderly/ patient in critical situation/ Front-line personnel/ people are quarantined mandatorily

2.Recruiting —Wuhan—Hubei province

3.Recruiting——shortened mothers pregnancy 34 weeks to 32 weeks, the service will continue to the delivery of the baby

4.Logistics——passed by local volunteer (Hubei Xiaogan coalition, Yunbao rescue team)

今天也比较奔波，早点休息

谢谢张医生 🙏

等你好消息

记得生了给我们报喜呀

一定的，谢谢各位! 🙏

10:28

承蒙各位厚爱，昨天上午剖宫产6斤2两的女宝，一切顺利。

谢谢各位菩萨 🙏🙏🙏

Feedbacks from the mothers

永恒 01112C19 2020/03/12 15:04

伴大家好，因为我在产后第二天就开始高烧，状态不太好感谢。其实9号那天在去路上的时候我都没有意识到事情的不过关，后来医生又让我做了羊水B超（因为5号产检的羊抽血尿检ct等检查，做完B超之后发现羊水只剩下1.5了，他的检查全部不做了，直接做Ct办理入院，马上安排剖腹，我是最后一个去的，确是第一个上手术台的，手术前医生让做好心里准备，只能尽力去抢救，所以新生儿科的医妇，但是因为太紧急，医院没有备血，所以我也是在设备和命大，宝宝出生5.1斤，没有大碍，我也没有出现产

个医生的话，当天我有5个未接电话，1条短信，群里医生没事，说实话非常感动，感谢你们团队救了我们母子，不常产检，后果会怎样，毕竟这次真的没有任何症状，没见过，为大家认真负责，为疫情期间为武汉产妇提供的帮助表

用萌动连续测试了好几天，说是胎心加速不过关，3.22凌晨卸货了~

谢谢你们的设备提醒呢 🙏

也辛苦您了，同时也恭喜宝妈 🌹

很感谢你们呢 🌹

应该做的哈，萌动的初衷也是希望能够帮助到更多的宝妈 ❤️

下午7:32

确实真的帮了我很大的忙，疫情到现在，我2个月没有产检过了。

当时一发作来医院宝宝就有点缺氧很危险，医生也看了我的萌动的近期报告，赶紧就安排手术了，目前宝宝也很健康。

1300 modoo monitors are manufactured, transported and used

Each one of them means:

Care
+
Companionship
+
Consultation
=
Safety of mom and
baby
Happiness of
one family

03 The intervention for the people with intellectual disability

The intervention for the people with intellectual disability-

Background

- 1、 The people with intellectual disability need to participate in behavioral intervention training on a daily basis. **Any interruption may lead to degradation.**
- 2、 After the outbreak of COVID-19, residents were restricted from entering and exiting the community and had traffic restrictions. **They didn't understand why they couldn't go out**, so they were prone to emotional and behavioral problems.
- 3、 Behavioral degradation and travel restrictions led to greater parental stress and more obvious emotional problems.

- 1、 Behavioral intervention courses and professional training.
- 2、 Individuals and families need professional psychological counseling.
- 3、 Family care issues for parents in isolation, and lack of supplies in remote isolation areas.

The intervention for the people with intellectual disability- Action

Establish an **emergency assistance network** for the “special need families” in the outbreak(most members are local parent organizations).

Local grid responds to the emergency assistance network for 10 areas affected most by the epidemic, including:

Online Course Development

Behavioral intervention training and emotional counseling of the people with intellectual disability, develop courses and conduct online teaching by special education institutions, behavioural training at home and psychological counseling online.

psychological Support

For stressed parents:
Open hotline and WeChat channel to provide psychological support.

Resource Mobilization

Home care and material needs:
Discover needs, and contact local communities, streets, and disabled people's federations to obtain care and material support.
Assisting families with intellectual disability to be tested and referred.

- 1、 Online courses: Xiaomeng Class, Autonomous Life
- 2、 Draft action guide for emergency network member units
- 3、 Aid information collection form
- 4、 Network construction: As of March 4, it covers 29 provinces / autonomous regions / directly-controlled municipalities in the country, with a total of 131 cities and counties. Through screening, 286 organizations have been confirmed to provide necessary support for families with emergency needs, and for the safety and basic living security of the people with intellectual disability.

04 Caring activities for the children of the medical personnel

Caring activities for the children of the medical personnel-Need

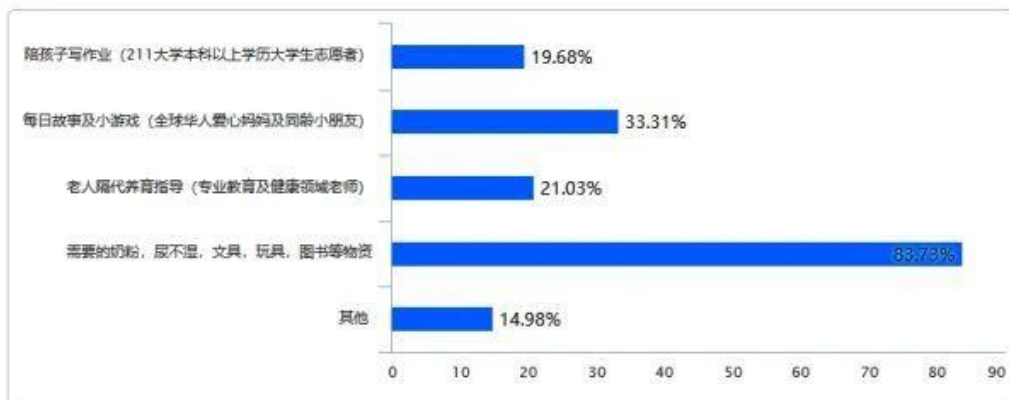

Launched by Yongzhen Foundation, and One Foundation supported it.

- 1、 During early lockdown, infants and school supplies **are in shortage**.
2. Medical personnels have no time to take care of their children. They need to accompany their children to do homework and instruct the elderly to take care of them.
3. Children in different ages have different needs.
