

How will we live with COVID-19?

Some ideas without clear answers yet

Tomohide ATSUMI, Ph.D.

Nippon Volunteer Network Active in Disaster

World with COVID-19

- × Changes are faster than the Climate Change
 - × Prevent the World from Returning to the Pre-Corona.
 - × Explore into the new Post-Corona era.
- × Theoretically,
 - × Nullification of Distance
 - × Nullification of Time
- × Practically,
 - × From Segmentation to Slidarity

Think about Nullification of Distance

- × Everything is not far away. It is just beside you.
- × Before COVID-19, disaster survivors live far away. It is difficult to come and help, but if you go there, then you are welcomed.
- × During COVID-19, a person just beside you may be a patient. Survivors are everywhere.
- × After COVID-19, we re-realize that local people help local people, while volunteers help those people from remote site, even internationally. How do we prepare?

Think about Nullification of Time

- × The faster, the better.
 - × Time was cycle (e.g., four seasons). Time was line (e.g., age).
 - × Modernization: Your time is same as my time. Even if you are in a different time zone, say, your 1minute is equal to my 1 minute.
- × During COVID-19: We found a different time. While I am doing X, you are doing Y. We share the current time on the earth.
- × After COVID-19, how do you use this type of time? For solidarity?

Then, let's practically move on from Segmentation to the Solidarity!

- × I think we share the same spirit together! To lead the spirit to the solidarity, it is, I think, better to work together:
 - × Let's help suffering and/or developing countries: COVID-19 is biologically equal, but socially unequal.
 - × Let's collaborate to use our PPTs: Archiving, Categorization, Translation, Additional Practices
 - × Let's Plan the International Symposium among us and publish its resolution.

× Have some committee?

Thank you very much!

謝謝！

ありがとうございました！

Let's keep practicing with deep thought!
